

From: Concern Residents of Kossoh Town Community

Date: August 23, 2024

Dear Sir/Madam,

Attestation: Liberation Medical Hospital's Contributions Kossoh Town Community.

To Whom It May Concern,

We, the undersigned residents of Kossoh Town, New London Community, located in the Western Rural District of Sierra Leone, hereby attest to the invaluable contributions that Liberation Medical Hospital has made and continues to make towards life sustaining health maintenance and well-being of our community. The emergence of this health facility has sent a message of hope, progress, opportunity and development in our community, the environs, and the Nation of Sierra Leone.

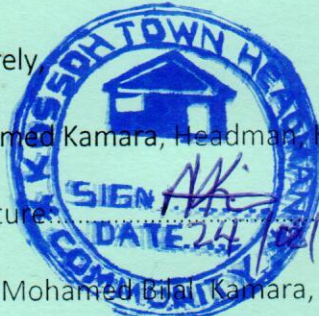

Prior to the establishment of Liberation Medical Hospital, our community experienced significant challenges in accessing affordable and adequate healthcare services. The peripheral health units serving our area often experienced drug shortages, understaff medical personnel and lacked the necessary resources to provide comprehensive care for our growing population. In addition, the poor road network and limited transportation options had hindered our ability to access essential medical treatment.

Since the establishment of Liberation Medical Hospital in October 2023, our community has seen an enormous improvement in addressing these challenges. The hospital's affordable and accessible healthcare services have significantly improved the health concerns of our community members. The dedicated medical team skill set, and expertise is a boom for the community. They have consistently demonstrated an infectious positive spirit. Their commitment to patient care, ensuring that everyone receives the needed medical care. Moreover, the hospital's efforts to make essential drugs and treatments available at reasonable prices have been a game changer to our residents who would have struggled to afford necessary medical care. This initiative has particularly benefited the most vulnerable members of our community, including infants and children.

To this end, we are delighted to recommend and endorse Liberation Medical Hospital for their exceptional services and dedication to the well-being of our community members.

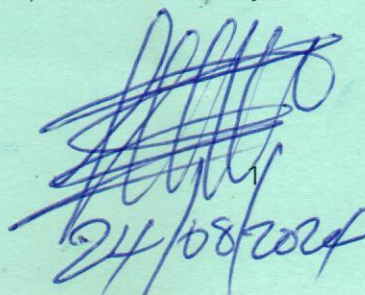

Sincerely,

Mohamed Kamara, Headman, Kossoh Town- New London Community
